

# Live And Learn

## House Of Fools

I've tried livin' it risky, relied on women and whiskey  
To chase my blues, turn my nights to days  
First rage only a pastime, with age more than a lifetime  
Day in, day out the world just turns away  
But everybody knows you live and you learn  
But the lessons just go on and on  
I guess we're gonna have to wait for all the pages to turn  
To find out if it's right or if it's wrong, you live and learn  
I've stopped lookin' for questions, I've got only suggestions  
Black and white can only turn to grey  
In time we're all gonna find out our times all gonna wind out  
And just count down until that judgement day  
But everybody knows you live and you learn  
But the lessons just go on and on and on  
I guess we're gonna have to wait for all the pages to turn  
To find out if it's right or if it's wrong, you live and learn, you live and learn
