The Everglow

Mae

Here's a night
and it shines
and it calls us on and on
so be here by my side
and watch the stars
they're ours
make a wish or just take charge
the moment comes get lost and go far
i think that we've got what it takes to get this heart to start beating again
so take it all the way
woah now our hearts are on the everglow
so just let go and fall into it
we begin
breathe in
here's our chance to go for something so this is where we win and take the game
no blame
there's a neon light inside it shines and tearing the down the walls in our way
i think that we've got what it takes to get this heart to start beating again
so take it all the way

woah now our hearts are on the everglow
deep inside we both know it
everything's hanging on this moment
woah and our hearts are on the everglow
so just let go and fall into it
Let's go inside and look deep into the night
the light is bright enough to send the weakest ones to go for the ride on
Oh, no, you cannot fade away
woah and our hearts are on the everglow
woah so just let go and fall into it
woah and our hearts are on the everglow
deep inside we both know it
everything's riding on this moment
woah and our hearts are on the everglow
every action makes a reaction
We'll figure it out and make it happen
woah and our hearts are on the everglow
so just let go and fall into it
