Bite Your Lip

New Cassettes

Yeah, you, you're biting your lower lip
Well, I'm still talking about what I can't get
With both hands around your hips
I can make you believeRelax and kickback
Just take your time
And I'll make sure that we shine
Oh no, I will not let you downYeah, you, you're biting your lower lip
Well, I'm still talking about what I can't get
With both hands around your hips
I can make you believe againThat we, we've been dying for so long
Now it's time to come undone
Wash away the tears
And we'll both carry onOnce more for sure
I found a way we can occupy our time
Rewind to find a place
We both can't resistYeah, you, you're biting your lower lip
Well, I'm still talking about what I can't get
With both hands around your hips
I can make you believe againThat we, we've been dying for so long
Now it's time to come undone
Wash away the tears
And we'll both carry onBaby, name a time and a place I swear I'll be there
I know just what you need so take me tonight
And you know that the way that you move, it always kills me
So now I'll take the lead and give you the timeI am so obvious
And all that I can do
You hold me down
And hope to God you feel it tooYeah, you, you're biting your lower lip
Well, I'm still talking about what I can't get
With both hands around your hips
I can make you believeThat you, you're biting your lower lip
Well, I'm still talking about what I can't get
With both hands around your hips
I can make you believeThat we, we've been dying for so long
Now it's time to come undone
Wash away the tears and we'll both carry on
Both carry on
