

Thermonuclear Warrior

Carnivore

The atom germ wars of centuries gone, precipitate genetic mutation
Social degeneration
Creatures born of malignant science
The children of technology, plutonium anthropology
Who will cleanse the mess left by the past?
Who will expurgate the scared cytoplasm?
To rid the earth of abomination
I proclaim my nomination, as the...
Thermonuclear warrior
Strands of malformed DNA strangulate our future
Chromosomal executioners
Recessive traits for lifelines hidden merge though evolution
facilitate cellular revolution
Who will cleanse the mess left by the past?
Who will expurgate the scared cytoplasm?
To rid the earth of abomination
I proclaim my nomination, as the...
Thermonuclear warrior
I seek the dying, sick and deformed all who would taint the species
Stabbing and choking and burning and drowning exterminate subhuman feces
Man has inbred his ancestors, a sort of human pollution
To every problem an answer must lie, to this I have a solution...
Crush, kill, destroy
I will smash any resistance
Crush, kill, destroy
The reason for my divine existence
You may ask what's right have I, to take human life this way
Well I'm in control, I make the rules, and I don't need your O.K.
Genocide is my way of life it's a fact I will not hide
The millions I've killed to sterilize, euthanasia's not homicide
Crush kill destroy
I will not tolerate imperfection
Crush kill destroy
I will impede the spread of infection
Let's Go!!
