

# Judge Me

**K. Michelle**

Heaven, heaven don't tame by my shoulder  
I just wanna make it, make it through the door before the glow  
I hate that I couldn't get right even if I tried  
It's a shame how we love but only God can judge Judge me, judge me all you want  
I'm only here babe, in a perfectly bubble  
I know it's easy to pop up your finger at me  
'Cause I save the pain that only I feel  
So judge me if you need, I bet it works just like me Oh, who wouldn't bite the apple and run on your face  
I know that I love, I love the way temptation taste  
I hate that I couldn't get right even if I tried  
It's a shame how we love but only God can judge Judge me, judge me all you want  
I'm only here babe, in a perfectly bubble  
I know it's easy to pop up your finger at me  
'Cause I save the pain that only I feel  
So judge me if you need, I bet it works just like me Judge me, judge me all you want  
I'm only here babe, in a perfectly bubble  
I know it's easy to pop up your finger at me  
'Cause I save the pain that only I feel  
So judge me if you need, I bet it works just like me  
Just like me  
I bet it works just like me  
Just like me
