Sound off the Alarms

The Generators

Lock the doors
Im sensing danger
Every day thing gets a little bit stranger
So now I hide in fear
For my own dear lifeGet ready now Im jumping shit
Cause hell If Im going down with it
They said the end was coming
But they couldnt nail down the timeHit the kill switch
This is it
Human kind cant co exist
Theres no turning back now
Theres no turning backSomebody sound off the alarms
We cant turn off what theyve turned on
We cant come back were too far goneRising oceans
Conficts in motion
Some turn their heads and dont take notice
The fire drill its ringing
Canary in the cold mine finally stopped singing
Its getting hotter and its harder to breathe
Its scaring the living daylights out of me
Here we are spinning out of control
Cmon now and grab a holdHit the kill switch
This is it
Human kind cant co exist
Theres no turning back now
theres no turning backSomebody sound off the alarms
The warning signs theyre always on
You cant come back when your too far gone
Somebody sound off the alarms
The strife of man it carries on
Wake the dead now
Cause we dont have long
