

Real

Goo Goo Dolls

You read the news, it turns you inside out
And everybody feels the same as you
In uncertain times, the uncertain rules apply
Caught in the blind spot of mirrored love
Can you feel real like you are?
Can you feel alive? The way I feel your light
And the biggest chance that we can take
Is open arms and wide awake
Hold me now so we can feel alive tonight
I need to feel you there
I want to know where I belong
And I felt the sting, the sting of corrosion
And I need a safe place to close my eyes
Can you feel real like you are?

Can you feel alive? The way I feel your light
And the biggest chance that we can take
Is open arms and wide awake
Hold me now so we can feel alive
Ooh, we were so lost
And it was so much more than you could bear
And I was caught in my defeat, you're alone and incomplete
Will this sound ever break down the walls?
Can you feel real like you are?
Can you feel your light the way I feel your light?
And the biggest chance that we can take
Is open arms and wide awake
Hold me now so we can feel alive
So I can feel alive tonight
