

Eye of the Storm

Blindside

I think I've stayed for the last time, goodbye
Hope is so much closer to beauty than sorrow
I think I'll leave and leave self pity to die
Reflection is always brighter than shadow Please come closer
Cause I don't even touch you anymore
Please see I'm walking in to the eye of the storm
And I'll still come out loving you even more Love is in the air tonight
So just breathe You made sure the atmosphere was thick tonight
So this is where it begins and where it ends
With a crack in a dark sky piercing light Please come closer
Cause my heart doesn't touch yours anymore
Please see I'm walking into the eye of the storm
And I'll still come out loving you even more Love is in the air tonight so just breathe
Breathe my spirit breathe
Love is in the air tonight so just breathe
Breathe my spirit breathe leave, leave now and don't look back
leave, leave now and don't you look back Please come closer
Cause I don't even touch you anymore Please see I'm walking in to the eye of the storm
And I'll still come out loving you even more Please come closer
Cause my heart doesn't touch yours anymore Please see I'm walking in to the eye of the storm
And I'll still come out loving you even more
