Natural

S Club 7

Loving you is not
Just luck or illusion
It's in the make-up of our DNAIt's not by chance
We make the perfect solution
Don't fight it baby
You know that it's just destiny's wayBaby lovin' you
Comes easily to me
It's what I'm livin' for
It's all in the chemistryBaby lovin' you
Is how it's meant to be
It's something that is
Oh so natural to me
Natural, oh baby, babyWe got the answers
But there's no explanation
We got each other baby
Come what mayIt's in the science
It's genetically proven
'Cos when you touch me
The reaction it just blows me awayBaby lovin' you
Comes easily to me
It's what I'm livin' for
It's all in the chemistryBaby lovin' you
Is how it's meant to be
It's something that is
Oh so natural to me
Natural, oh baby, babyTurn off the light
Lay your head next to mine
Take it slowly
A step at a timeC'mon get close, closer to me
It's oh so natural
It's oh so easy to seeBaby lovin' you
Comes easily to me
It's what I'm livin' for
It's all in the chemistryBaby lovin' you
Is how it's meant to be
It's something that is
Oh so natural to meBaby lovin' you
Comes easily to me
It's what I'm livin' for

It's all in the chemistryBaby lovin' you
Is how it's meant to be
It's something that is
Oh so natural to meBaby lovin' you
Comes easily to me
It's what I'm livin' for
It's all in the chemistryBaby lovin' you
Is how it's meant to be
It's something that is
Oh so natural to me
