Keep Dreaming Upside Down

October Fall

I was burning up to fall apart
And the walls fall down around my heart

Now I'm feeling sick

It's always something latelyI was broken down but still looked good I was kissing clocks, you knew I would

Now I'm feeling scared

Someone say that they miss this The night is young, we wait for love Upside down we dream

At home we sleep and wait to leave

Upside down we dream

And we are all brighter than stars back homeDon't leave so fast

Don't leave so fastI was in the sun but feeling cold

I was grabbing tight but lost a hold

Now who'd wanna stay?

Yeah, well we're all here changing I was ripped apart but held by glue I was full of lies but spoke the truth

Now I've lost myself

Oh, I forgot how this feltThe night is young, we wait for love

Upside down we dream

At home we sleep and wait to leave

Upside down we dream

And we are all brighter than stars back homeDon't leave so fast

Don't leave so fastThe night is young, we wait for love

Upside down we dream

At home we sleep and wait to leave

Upside down we dream

And we are all brighter than stars back homeDon't leave so fast

Don't leave so fast
