Sainted

Embrace

I've always been wholehearted
But it would take a saint to understand
And so they had me martyred, so I'd find outThe sky explodes above us
And I know there's no other above you
I only touched the surface but I found outAnd I won't leave before an army makes me run
Big fish eat the little ones
You and me, we're sainted
Don't let them break your soulThe chemicals have started
They stop me finding anybody new
Why was I your target, do I stand out?The stars were shining for us
And I know there's no other above you
I'm rolling with the punches, I won't lie downAnd I won't leave before an army makes me run
Big fish eat the little ones
You and me, we're sainted
Don't let them break your soulRoll the dice, 'cause nothing's ever sure in life
Even though the stakes are high, we're already sainted
You're the first, I know it 'cause I'm fit to burst
I know it 'cause my halo hurts, I feel like I've been saintedAnd I won't leave before an army makes me run
Big fish eat the little ones
You and me, we're sainted
Don't let them break your soulAnd I won't leave before an army makes me run
Big fish eat the little ones
You and me, we're sainted
Don't let them break your soul
