

My my love

Bigott

So many moons have come and gone all alone
I heard this song inside me to wait
I was told but now I found a different sound
I hear when you're around me
It's something new because of you
I hope I hear it forever

[Chorus:]
My, my love
I've been without you too long
My, my love
I've been running too fast to belong to anyone
But then you came along

When first I laid eyes upon your face
This song replaced all the others I have written
It's all brand new because of you
Feels like I've known you forever

[Chorus:]
My, my love
I've been without you too long
My, my love
I've been running too fast to belong to anyone
But then you came along

You warm me like sunshine
You cool me like summer rain
Just let me sit down beside you
Over and over again

[Chorus:]
My, my love
I've been without you too long
My, my love
I've been running too fast to belong to anyone
But then you came along
