Fermenting Innards (Peel Session)

Carcass

Your pulverized torso languishes in it's pool of pus
Minced, cancerous viscera, gore seeps from the guts
My fetid fetish is to excavate the moulding rot
I drool my gastric juices as I chomp on your blood clotsFermenting innards, bubbling with rot
Alcoholic pus, dissolves the wooden boxI gouge into the chest's cavity to rip out the intestines
Slivering soft entrails to release the foaming secretions
I suck up the concoction and eat the decay
With cankered disgorgement, I excrete my gurgling preyBile, chyme and blood in the offal effervesce
I eviscerate the bowels and drink the clotted cess
