

Isolation

Sine Seawave

You arrive like a dragonfly
Float above the grass, trembling still
Think you might open up your heart
Open up your heart, someday you will
 Yes, there's always a way
 Yes, there's always a way
 To end this isolation
 When you rise like the Milky Way
 On a luminous night the epic unknown
 Though I try, try to find a sign
 Of another life, I am alone
 And there's always a way
 Yes, there's always a way
 To end this isolation
 One step away from everyone
 If you could open it up
 You could connect it to us
 One step is more than enough
 To get a look in
 You could be already gone
 I wish you would take me along
 To end this isolation
 To end this isolation
 I try so hard to get it right
 Look for something in your eyes
 And I see it
 But you won't let yourself feel it
 I wait for you to make a sign
 Let the door open in your eyes
 And I believe it
 That one day you'll step inside
