It's You

Ryan Cabrera

Another night goes by without sleeping
'Cause I know I won't wake up next to you
Another life goes by without dreaming
And I can't help but think that mine will too
I'm standing before you with this label on my head
I'm pleading before you for you to understand
Baby it's you
When I look up in the sky, I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of you
The time is slow and I am sinking
Into a hole blackened with lies
And though I made it myself
You stand watching as my life passes me by
I'm standing before you with this label on my head
I'm pleading before you for you to understand
How much I adore you
I'll be there till the end
When everything falls down
Will you hold my hand?
Baby it's you
When I look up in the sky, I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of you
Yeah, yeah, baby it's you
When I look up in the sky I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of you
