

# Guess

## DJ Krust

By surprise the fragile fluids that were  
Seem to disappear behind the eye in disguise  
Or how it ought to really ought to be  
Like crystal breaking in a spoon and it's too late  
A finger bends another glass of fruitBy surprise I finally see the problems in their eyes  
Or how it ought to be really ought to be  
Behind my eyes a different set of keys A figure A to B  
Are you mean or do you mean goodbye?Are you clear, do you mean goodbye?  
Then they say to you  
Say it here, say it hereA different time you stayed too soon  
Or played before I even know  
Say it here, say it hereA candle shows the lack of what I need to see to be confused  
But not to use a better friend than  
You're his he finds he stayed too soon or played before I even knew  
I guess it's just of business now, I guessAre you clear, do you mean goodbye?  
When I say  
Say it here, say it hereDifferent time you stayed too soon  
Or played before I even knew  
Are you clear? Say it here
