

Sure Not Over You

Dinosaur Jr.

Every night, it's another girl.
I obsess, not my finest trait.
But I need to feel today, why am I driving you away?
Sure not over you So you said, there's a way to be.
You don't have to bottom out alone.
But there's things you need to be.
And it all can't come from me.
Every night we're drifting farther
All the love and light has gotta count for something right? Gotta pull it together
Don't wanna blow it now
you're fed up and feeling strange
And you'll split if I don't change
Sure not over you Piece together how it come to this..
Flowed so easily before
So it's me that's flaking out
Wish I knew what that's about
Sure not over you
Sure not over you
Every night we're drifting farther
A Vibe so bad I wanna puke
But all the love and light has gotta count for something right?
