

The Final Conflict

Burning Image

It's cold and dark in this desolate world

It crumbles before my eyes

Last destruction by the know it all'sAnd now the end is nearLead us all, lead us all into The Final Conflict

Make me feel, make me realize just where we went wrong

Let me learn, teach me things that no one can understand

Lead us all, lead us all into The Final ConflictThe sky turns red, like the blood on my hands

We live in a world that's gone

We tried our best to keep it alive

But no one cared
