It's About Time

Public Announcement

You know damn well where he was last night
It makes no sense everyday you fight
Makes me so mad what he puts you through
When I'm the only man that's made for you
Why must I sit back and dry your tears?
Just get with me and I'll erase your fears
Girl it's about time to let him know
You have a real man so he's got to go
Don't just have me in the background
Stop keepin' him around
It's about time for him to leave
With open arms you I will receive
It's about time to let him know
That it's about time to let him go
Girl I'm not scared of what he'll say to you
He's not a man don't give in so easy
Girl understand just for you I'll be
I'll work two jobs to supply your needs
So must I sit back and dry your tears?
Come an' get with me and I'll erase your fears
Girl it's about time to let him know
You have a real man so he's got to go
Don't just have me in the background
Stop keepin' him around
It's about time for him to leave
With open arms you I will receive
It's about time to let him know
That it's about time to let him go
I'm not like him girl, I'll never lie
I'll ease the pain the feelings down inside
It's about time to let him know
You have a real man so he's got to go
Don't just have me in the background
Stop keepin' him around
It's about time for him to leave
With open arms you I will receive
It's about time to let him know
That it's about time to let him go
Let him go, let him go

Let him go, let him go
Let him go, let him go
It's about time to let him know
That it's about time to let him go
It's about time to let him know
You have a real man so he's got to go
Don't just have me in the background
Stop keepin' him around
It's about time for him to leave
With open arms you I will receive
It's about time
