And I

Hans Thalau

It's been a while how have you been doing
Do you over think about me and you and
All the things we used to do, the times that we've shared
Well I've been looking for love and affection
It's brought me back in your direction
Even though we've been apart, you're part of my soul
Okay I know
(I know I was a fool to)
A fool
(To lose my faith in you)
But girl before you go
I want you to know
That I think of you every day baby
And I can't seem to get away from these feelings
And I, I need to tell you some how
That I need your love right now
(Said I need your love)
Looking back I can see things clearly
The mistakes that I've paid for dearly
Taking love for granted only leaves you alone
Well, if we talked you would understand that
Time has made me a better man and
With your love behind me there's nowhere I can't go
So take a chance
(Just take a chance on me)
And you'll see

(It's where you need to be)
If your heart it tells you so, you'll know what I know
That I think of you every day baby
And I, I can't seem to get away from these feelings
And I, I need to tell you some how
That I need your love right now
Right now is the time for both of us
To put aside our differences and trust
All the words I never used to say
Now I've found a way
(Now I've found a way)
That I think of you every day baby

(I think of you, I think of you, baby)
And I can't seem to get away from these feelings
(And I, I can't seem to, I can't seem to, get away, get away)
And I, I need to tell you some how
(Some how)
That I need your love
(Your love, right now)
That I think of you every day, baby
(Right now, baby)
And I can't seem to get away from these feelings
(And I, I can't seem from these feelings)
And I, I need to tell you some how
That I need your love right now
(Said I need your love right now)
