

# Sister Rosetta Goes Before Us

[Alison Krauss](#)

Strange things are happening everyday  
I hear the music up above my head  
Though the side of my heart has left me again  
I hear music up above  
Secrets are written in the sky  
Looks like I've lost the love I've never found  
Though the sound of hope has left me again  
I hear music up above  
Standing in my broken hope all night long  
Darkness held me like a friend when love wore off

Looking for the land that's hidden in the cross  
The finder's lost  
I know I've loved you too much  
I'll go alone to get through  
I hear Rosetta singing in the night  
Echoes of light that shine like stars after they're gone  
And tonight she's my guide as I go on alone  
With the music up above
