You Make Me Crazy

Utopia

I waited all night
Smoked a hundred cigarettes
I chewed my lip 'til it bled
But the phone made not a soundSometimes, I wonder
If you ever wonder, what's become of little old me
But I ain't no baby, I ain't gonna cry but baby
You don't know what's going on inside meY'know you make me crazy
What you do to me
It's a chemical reaction or an allergy
Y'know you make me crazy
You're aware of that
Why don't you come and put me away?It was a long night
I could barely keep my head
I heard a knock on the door
It was only Harry JonesI used to wonder
What it is that makes me feel like I can't be free
'Cause you don't give me nothing
You never give me nothing
But you don't know what's going on inside meY'know you make me crazy
I'm in misery
Are you interested enough to see what's left of me?
Y'know you make me crazy
You're aware of that
Why don't you come and put me away?Y'know you make me crazy
What you do to me
It's a chemical reaction or an allergy
Y'know you make me crazy
You're aware of that
Why don't you come and put me away?You scared me
The way you move in the night
Your face is something frightening
You're not so niceI'm gonna wonder
Who you spend your time with
Everywhere you go and what you seeI know, I'm not your daddy
I don't want to be your daddy
But you know what's going on inside meY'know you make me crazy
What you do to me
It's a chemical reaction or an allergy
Y'know you make me crazy

You're aware of that
Why don't you come and put me away?Y'know you make me crazy
I'm in misery
Are you interested enough to see what's left of me?
Y'know you make me crazy
You're aware of that
Why don't you come and put me away?
