

# First Bite

## New Found Glory

Whatever happened to forgive and forget?  
I can admit that I'm a letdown.  
Mostly out of step now.  
I can't move on until I fully admit.  
That the ship that I've run underground  
Will never come back around. It's foolish for me to think it's for the best.  
With one hand on my mouth,  
and the other ripping out my chest.  
We started over but you'll never forget,  
I was the first.  
And now I'm sleeping in our bed. Last chance.  
I can't think about it all night.  
You could eat me up  
with the taste of the first bite.  
Last chance.  
I can't think about it all night.  
I would rather wake up alone than,  
Be with you tonight. I'll never learn to shut my mouth,  
and move on.  
I will admit to my mistakes now.  
Forget about common ground.  
I started over,  
But I'll never forget.  
I was the first.  
now I'm sleeping in her, not your. Last chance.  
I can't think about it all night.  
You could eat me up  
With the taste of the first bite.  
I would rather wake up alone than,  
Be with you tonight.  
Be with you tonight. Last chance.  
I can't think about it all night.  
I would rather wake up alone than,  
Be with you tonight. Hold on. I regret.  
Folding in the heat of the moment.  
There's no way to go back.  
The life you took can't heal.  
You know that.  
Hold on. I regret.

Folding in the heat of the moment.  
There's no way to go back.  
The life you took can't heal.  
You know that.It only hurts cause I let it.  
You use the past as a weapon.And now I'm sleeping in our bed.Last chance.  
I can't think about it all night.  
You could eat me up  
With the taste of the first fight.  
Best as it gets,  
We've been at it all night.  
I would rather wake up alone than,  
Be with you tonight.  
Be with you tonight.Last chance.  
I can't think about it all night.  
Oh.
