

# Voodoo Baby

## Hypnogaja

Should've known the night I met you  
You would be my doom  
Swear I heard the walls crying  
When you walked into the room  
Should've been more careful  
When the black cat crossed my path  
Cause just one look in your eyes  
And there could be no turning back

Now I get dizzy every time you come around  
The room is spinning faster but my feet are on the ground  
No chains around me but I can't seem to break free  
You must have cast some kind of spell on me

You know you can make me do anything you want me to  
No request is too taboo, must be voodoo baby  
You know all the things to say, to make sure that I always stay  
You know how to get your way, must be voodoo baby

You hold the power with the doll that's in your hand  
Stick it with a pin and you've got me at your command  
In the midnight hour darkness falls across the land  
You tame the beast within, turn the monster into man

Every day with you is like Halloween  
You know a thousand ways to make me scream  
You took the dead in me and made it come alive  
Nothing in the world can tear me from your side  
You could look like the creature from the Black Lagoon  
You could howl like the Wolfman at the moon  
You could walk like the Bride of Frankenstein  
You still would be mine, all mine

---
