

She's My Ex

All

She's my ex. I can't cross her from my memory And I know I'll never feel that way again She meant everything to me she meant every word she said She's just my ex When she said, "I'll never love again. Be my ex until the end." She's my ex. She marks the spot where I'm the weakest one I can't expect she'll change her ways; can't accept the things she's done She's my ex. Don't cross her path she still belongs to me She'll be my ex till I say when till I get her back again She's just my ex. Nothing more nothing less but she'll always be my ex And I know I'll never feel this way again 'Cause I know I'll never love again. Never need another friend Still have a million things to say, guess I'm better off this way She's my ex. She'll cross my mind a thousand times today Cause I know she'll never love again. She 'll be my ex until the end And I know I'll never feel this way again She's just my ex. Nothing more nothing less but she's still my ex And I could never kiss that face goodbye But I could never stop to wonder why And I know I'll never feel this way again She looks so pretty, she looks so pretty She's just my ex
