

# Blue On Blue

James Blunt

How come you don't wanna see me  
How come you've gone and left me alone  
How come you took a slow boat to China  
What can I do if I can't get through to you  
Baby blue on blue I want you more  
Than I ever wanted  
Than I ever needed  
Anyone I ever knew I love you [I love you] more than ever  
Thought that I'd never feel the way that I do How long you gonna leave me here standing  
How long til you gonna make up your mind  
How long is your balloon ride to nowhere  
And what can I do if I can't be there with you  
Baby blue on blue I want you more  
Than I ever wanted  
Than I ever needed  
Anyone I ever knew I love you more than ever  
Thought that I'd never feel the way that I do Coming under fire  
We're coming under fire  
I'm coming under fire  
I'm coming under fire I'm coming under fire  
I'm coming under fire  
I'm coming under fire  
I'm coming under fire  
Baby blue on blue
