

Just Slide (feat. Jaden Smith)

Harry Hudson

Tell me if you love me, tell me if you understand
I just need somebody, even if I ain't your man
You give me your body, I'll give you the upper hand
So tell me if you love me, tell me if you understandIf you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
I hope you feel something
Telling everybody, even if they ain't your friend
America's a burden, you never gave me a chance
It gets musty in the dark, still I cannot erase your hand
So tell me if you love me, I don't think you understandIf you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
I hope you feel somethingIf you feel something, then just slide, then just slide
If you feel something, hit my line cause I'll type
If you ever need a friend, we can make it into mend
Girl I know you got a man but we only talking
Love when you vent to me, I'll be honest
Pacing body, used to hide it
On the beach I found a message in a bottle and I
Wrote it to you, I was crying in Toronto and I
Lied in bed, hiding all of my sorrows, your eyes
Keep me going, though without you I could never survive
You ain't hit me back tonight but tomorrow maybelf you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
Then just slide, then just slide
If you feel something
I hope you feel something
