Louder Than Words

Against All Authority

Advisory - the following lyrics contain explicit language:

You treat the symptoms not the sickness and condemn a whole race for the benefits your system's Offering you attack the class And claim you support their ass That perpetuates your hate And still you defend the system Your way of thinking sucks We've had enough Your institutions are corrupt But our voices go unheard And if we all screamed "Fuck the system!" Speak as loud as our words Well it's just a dream if our actions never Your ethnocentric and racial slurs unmask your ignorance Your front is falling down On your soapbox above the masses Louder than words Your contempt for the lower classes You think you're so goddamn profound
