## **Forever In Your Hands**

## **All That Remains**

I know that I can stand my head high Forget not where I fall Still I find why and reasonYet that conflict still filling me Mistrust venom inside of me I am not the man that you see Just look inside meTrust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your hands How I miss February still Now that this becomes the moment Of all our failuresYet that conflict still filling me Mistrust venom inside of me I am not the man that you see Just look inside meTrust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your handsTrust in me the way I trusted you I know we could have done this together If you believed in me like I believed in you My heart would be forever in your hands
