America the Video

Chroma Key

I was half outside and half inside a dream
When I thought I heard your voice on my machine
Sang along had the song almost memorized
Liked the track so I laid back and let it fossilizeI've got all of this on video
It just gets better every episodeAmerica I was blind but now I see
America right there in front of meLost my head in my hotel room
When the ground shook
Had to choose between the Bible
And the phone bookYou're never home but that's okay
It's so much easier that way
'Cause I can't tell it to your face
In real time anywayAmerica I was blind but now I see
America right there in front of meAnd it makes no sense to me
Unless I see it on TV
So just launch that satellite
And get it rightAmerica I was blind but now I see
America right there in front of meAnd it makes no sense to me
Unless I see it on TV
So just launch that satellite
And get it rightSometimes the answer just comes
Sometimes the answer just comes
