

# City Streets

## Jersey

I've been around and I've seen the worlds collide  
From the East Coast to California, yeah  
I'm tryin' to live this dream and the streets won't take my name  
And I'll take life by the throat, fuck you And you might think that we've got it made  
When the crowd is huge and they're calling our name But for now I'm alone in this city tonight  
All alone, these city streets are cold  
Another night, my pockets all turned out  
All alone, these city streets are cold  
Another night, my pockets all turned out  
All turned out I've been around and I've seen the worlds collide  
From the East Coast to California, yeah  
I'm tryin' to live this dream and the streets won't take my name  
And I'll take life by the throat, fuck you And you might think that we've got it made  
When the crowd is huge and they're calling our name But for now I'm alone in this city tonight  
All alone, these city streets are cold  
Another night, my pockets all turned out  
All alone, these city streets are cold  
Another night, my pockets all turned out But for now I'm alone in this city tonight  
All alone, these city streets are cold  
Another night, my pockets all turned out  
All alone, these city streets are cold  
Another night, my pockets all turned out  
All turned out, all turned out
