

Searchlights (Indoor Soccer)

Falling Up

Its like a breath before the dive
Its like the truth after a lie
This flight is taking over
Searchlights in every corner Like I love you when youre gone
Escaping in the dawn
I swear well flood your city
No choice its what youre getting If you want to breathe will you just, let me know
If you want it then youll see it, let me know
Wash away the tears will you just, let me know
Need to see it then youll want it, let me know The secrets in the wind
The rumors now begin
You want to hear the silence
You want the quiet sirens His blood is like the break
The love you will not take
I swear well flood your city
No choice its what youre getting If you want to breathe will you just, let me know
If you want it then youll see it, let me know
Wash away the tears will you just, let me know
Need to see it then youll want it, let me know No one can breathe, no one can see
They are asleep, they will be seen Breakaway the voice is calling
Wake up youre asleep and falling
Not to late to open up your heart He will heal the shattered hopes
And fly away the broken souls
Its not too late to find out who you are If you want to breathe will you just, let me know
If you want it then youll see it, let me know
Wash away the tears will you just, let me know
Need to see it then youll want it, let me know
