

Something's Got to Give

The Associates (Billy MacKenzie)

Something's really got to change
The ways we live are lives
In disregard for one another
Well, can't we see it's time to change our perception? Something's really got to give
How can we live this way
So much pain and suffering
So we must overcome Love, sweet love, will sustain us All your money and possessions
They mean nothing in the span of time
Open your eyes and see the real life
We can make a difference if we try Something's really got to change
The way we live our lives
Prisoners to our own mistakes
We've got to wise up time to change our perception Something's really got to give
How can we live this way?
Take some time to recognize
What is false and part with it Love, sweet love, will sustain us All your money and possessions
They mean nothing in the span of time
Open your eyes and see the real life
We can make a difference if we try Love, sweet love, will sustain us Love will overcome
We'll be as one
We'll be as one
Will overcome Love, why are we so blind?
Why are we so cold?
Why are we so cold?
Why are we so blind? I was to tear down these walls
They've built around us
I was to tear down these walls
'Cause something's got to give
