

Android

The Prodigy

Changing sides, follow lines
Frequencies decide
Who designed me this way
And who's around to play? Adjust my gain
Replace my fear with pain
I'm on a wave
Select any game to save Will we fight it? Will we play?
Will we start all over again?
Well we better do something
I'm losing this game again
The same old game Time to change, I'm corrupted
Change my disk, erase me, reboot, delete
I've had enough, my trash bin is full
Now empty my head, please give me the chance New start, restart
Empty pages
Make some changes
Install everything new I'm sick of you, hunting my thoughts
I don't wanna be your android anymore New start, restart
Install everything new
Erase me, reboot, delete Will we fight it? Will we play?
Will we start all over again?
Well we better do something
I'm losing this game again
The same old game Adjust my gain
Replace my fear with pain
I'm on a wave
Select any game to save
