

Out Of This Misery

Prong

I'll take no blame
For some other's mistake
A fossil of the past
Continue underrate The ability to end a life
No stability in opinions not alike
Not alike
Opinions not alike Someone should take me, out of your misery, yeah
If I should take it any further, any further
I'll end it, you out of this misery, yeah
Out of this misery, yeah I will not shame
For a deed undone
I'm reaching for the stars
Spittin' at the sun I'll take the liberty to get you off my back
I want your history taken off the map
Off the map
Your history taken off the map Someone should take me, out of your misery, yeah
If I should take it any further, any further
I'll end it, you out of this misery, yeah
Out of this misery, yeah You've got life
Blood on our hands
This is no life Someone should take me, out of your misery, yeah
If I should take it any further, any further
I'll end it, you Someone should take me, out of your misery, yeah
If I should take it any further, further
I'll end it, you out of this misery, yeah
Out of this misery, yeah, out of this misery, yeah
