

# Never Enough

Hawk Nelson

Some days I spend all day on the phone  
And other days I would just rather be alone  
Some days I feel so insignificant  
Like it doesn't really even matter I've been caught under the radar  
So help me please It's been that kind of day so just go away  
And let the machine say what I want it to say  
It's never enough, it keeps getting tough  
I wanna listen to your voice but it keeps breaking up  
It's never enough Some days I just don't wanna leave my home  
And other days I'm alive like a rolling stone  
Some days I feel like the whole world  
Is waiting on an answer I've been caught under the radar  
So help me please It's been that kind of day so just go away  
And let the machine say what I want it to say  
It's never enough, it keeps getting tough  
I wanna listen to your voice but it keeps breaking up And I know that we all make mistakes  
'Cause I'm guilty as charged with  
A case of foot in mouth disease  
So help me see clearly as I try to just get myself  
To a place where my lens can adjust It's never enough I've been caught under the radar  
So help me please And I know that we all make mistakes  
'Cause I'm guilty as charged with  
A case of foot in mouth disease  
So help me see clearly as I try to just get myself  
To a place where my lens can adjust It's been that kind of day so just go away It's never enough  
It's never enough  
Oh, it's never enough
