

Freeze

Pay The Girl

So close, so deep inside me
I would be you and you would be me
Right here, it's now or never
We've come this far, let's stay together
All this time we never knew
Freeze right here, turn around
Lean into me, we fall to the ground
We don't even notice who's around
We're getting closer now
Right now, I'm crazy for you
Your playful eyes, I can't ignore you
We're friends and we're lovers
We're turning on as we discover
All this time we never knew
You'll be good to me
And I'll be good to you
One kiss, we live for the thrill
We live for the moment
When time stands still
Freeze right here, turn around
Hold onto me, we don't make a sound
We don't even notice who's around
Freeze right here, turn around
Lean into me, we don't even notice who's around
Freeze right here
