

# Dog Days

## 50 Foot Wave

Rats scatter after waves on the dirty beach  
You're seriously losing me  
A shiny object caught my eye, of course  
These dog days always leave me with a stomach ache  
These dog days always leave me with a stomach ache One dip in the well and I'm done in  
Coffee and vitamins, breakfast of champions  
Don't touch me I don't know where you've been  
Don't touch me I don't know where you've been Simultaneously attracted and repelled  
If you don't know by now, I'll never tell  
I wake up a ton of unkissed guilt  
Just keep telling me this is life, we didn't miss it  
Just keep telling me this is life, we didn't miss it
