

Butterfly

Serj Tankian

Chorus:

Spare me the night trampled upon by submission

A mask within ones own inhibition

Where the only prohibition is love

Spare me the night trampled upon by submission

A mask within ones own inhibition

Where the only prohibition is loveLoveChildren outcry grandfather sky

Rivers surviving through our eyes

We certify, how you falsify

The beauty of a moth turned butterfly, butterflyChorus:

Spare me the night trample upon my submission

A mask within ones own inhibition

Where the only prohibition is love

We are being sacrificed by our own suspicions

We are being sodomized by reputationOceans calcified, eagles gratified

I won't be crucified nor terrified, I'm not terrified

Before we say goodbye, no need to falsify

The beauty of a moth turned butterfly, butterflyChorus:

Spare me the night trampled upon by submission

A mask within ones own inhibition

Where the only prohibition is love

We are being sacrificed by our own suspicions

We are being sodomized by reputations

We are being sacrificed by our own suspicions

We are being sodomized by reputationsThe dark gray mirror of fact scar

Nannies are nights with our half sister moon

Why can't we switch up automatically to eco-centric persuasions?

Why can't we ditch autocracy for eco-centric persuasions now?We are being sacrificed by our own suspicions

We are being sodomized by reputations

We are being sacrificed by our own suspicions

We are being sodomized by reputations
