Lonely Nights

Lee Andrews

No more lonely nights
For everybody that find's their way
Someone is lost
For everybody who feels the fear
I'll take half the pain that you hide
Inside
Chorus:
If it's meant for you, it won't pass you by,
Don't live your life on the line
Like a carousel, it'll turn around, so many times
We might change a bit, doesn't everyone,
Lost in the moment we find
And madness is right, when you're by my side,
No more lonely nights
So many words that I meant to say
Don't come out right

So many chances I have to take
Girl if I've never told your before
Your beautiful
Chorus
Everytime that we kiss you take me breath away
I could talk for the world but you can silence me
I get lost in your arms when you're holding me
No more lonely nights
If it's meant for you, it won't pass you by
Chorus(
