Beam Me Up

Yacht

High above the clouds somewhere
The cold of space spreads thin
We endeavor to look out

But they are looking inNo man is an island and no planet is in turn And in six million years we'll stand together and watch it burnThe future is a poem

'Cause it doesn't yet exist

We don't know if we reach out

To tentacle or fistNo man is an island and no planet is in turn

And in six million years we'll stand together and watch it burn

Watch it burn! burn!

B-b-beam me up

B-b-beam me up

B-b-beam me upThere are nights that I burn out

I drink deep from my cup

I look all around me

And think, "Oh god, beam me up!"No man is an island and no planet is in turn And in six million years we'll stand together and watch it burnB-b-beam me up

B-b-beam me up

B-b-beam me up

B-b-b-beam me upPlease beam me uuuuuuuuuuuuuuuuuuuu
