

The Doctor Will See You Now

Wax Fang

So glad that i finally found you
Suppose we never been introduced
Don't let it go to your head
Don't let it slip through your fingers
Don't see a doctor unless
Something's bothering you
Now that all of your dreams have come true
Frau, what's a girl like me to do?
Don't let it go to your head
Don't let it slip through your fingers
Don't see a doctor unless
Something's bothering you
Can't you escape from your past?
Must your demons always be demons?
Until you lay them all to rest they'll come following you
They always do
