Play Me Some Fiddle

The Charlie Daniels Band

Every time I hear a fiddle and it's cookin' just a little

Well, it makes me want to jump up and run

And if he's sawing with some soul boogie woogie rock 'n' roll

Well, I know I'm gonna have some funAnd when the rosin' starts to fly and I'm lookin' in the eye

Like I'm just about to blow a fuse

Mama, call the doctor 'cause your boy has got

The rocking boogie woogie fiddle country bluesI met a man from Tennessee, this is what he said to me

He said, "Music is a rhapsody"

He picked up his violin, stuck it underneath his chin
And started playing me a symphonyI said, "That ain't the way it's done, let me see that fiddle son
And I sawed him off a chorus or two"

He said, "You'd better call the doctor 'cause I think I've got
The rocking boogie woogie fiddle country blues"Now if you want to play me some fiddle
I'll tell you right from the start

You'd better play me something lowdown hoedown honking
I don't want to hear no funeral marchIt's got to pick me up and roll me over
It's got to make me want to jump up and sing
If it ain't buzzing like a beehive, kick it into overdrive
Or it don't mean a doggone thingSo let me rosin' up my bow and I think that I can show you
The way I like to play this thing

Let's put some boogie rhythm in it, kick it on up to the limit
I'm gonna put some fire on these stringsAnd if you feel your feet start moving to the beat
And you feel like you've got ants in your shoes
Well you'd better call the doctor 'cause you've probably got
The rocking boogie woogie fiddle country blues
