

Implosionatic

Hot Hot Heat

I think it's time you take another look around if you're gonna bring a knife into a gunfight bragging how you're sick of hearing every single human being seeing as they're watching but can't see past what they're seeing

You can keep em at bat but put that knife away

Always with the wild card you're gonna wanna play cuz you're my implosionatic

My implosion addict

That a boy

Don't rock the boat

That a boy

Let it implode

I think it's time you take another couple days off

Gotta make a conversation such a face off

I'm betting debt is threatening to make it worse

Try to hide you're dreaming up an epitaphic verse

You can keep em at bay but put your pills away

Always with the wild card you always wanna play

So much for dying before you're 30 or 27 like Jan and Jim

Get on it

Where's your iconic all too ironic romantic tragedy recorded quadraphonic?
