

Foul Body Autopsy

Necrophagist

Snorting the vilely stench of putrescence
Coffin lies exhumed in front of me
Foul stiff strewn with papillae and pores
Fermenting stiff corpse putrefies Slicing, bisecting, incising the stiff
Stomach wall is opening, primitive diagnosis
Remove internal organs, primitive autopsy Sawing the weak head of the corpse I saw
Slicing cerebral bisection
Eviscerate slushy bowels ripped out at once
Perfecting foul body autopsy
