Come To Me

Carl Thomas

Baby, there's something that I just wanna tell you
And you know I never needed you more than I need you right now
And I swallow my pride, I'm really ready to listen
Just come to me, tell me I'm the oneOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over againSaid I need to know about the way you're feeling, baby
'Cause in my heart, love just wants to grow, oh
So I'll move it slow because there's no real way of knowing
If you feel the same and want to show, show meOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over againYou're my baby girl and nothing else could ever matter
When we love, I just can't get enough
But if we move too fast then we regret the morning after
When will there be time enough for us, for usOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over againYou make me feel so brand new
I just wanna spend my time with you
And I'll never let someone so true
I just wanna love you overOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over againOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over againOh baby, come to me, say you'll love me over
I really need to be your one and only lover
I can give you what you need, say you'll love me over again
Love me over again
