

Names of Stars

Weyes Blood

Well I looked into names of the stars
Found how close and far they all are
Took the cure and I signed my name
Felt the rush, the infinity wave

They seem so far
You canâ€™t count them, they just are
I carried a flame
From a star
Nothingâ€™s too far

They seem so far

How could they be
Part of who you are?

And I feel like Iâ€™ve entered this Earth
Through the atmosphere
And Iâ€™m burning up while Iâ€™m here
And Iâ€™ll burn â€™till the end, my dear

They go so far
And you canâ€™t tell where you are
I carry a flame
From a star
Nothingâ€™s too far

They seem so far

How could they be
Part of who you are?
They seem so far

And I looked into names of the stars
Found how close and far they all are
Felt (things/beings older??) in you and me
Felt the face of the galaxy

They go so far
And you canâ€™t tell where you are

I carry a flame
From a star
Nothingâ€™s too far
