

We're Just Friends

[Wilco](#)

Over and over and over again
I say that were just friends Forget the implications
Infatuations end
If love's so easy, why is it hard?
I can't imagine ever being apart I'll come back to you
It'd be brand new
But I promise
We're just friends Over and over and over again
I try to make amends For everything that I've done wrong
My whole world just spins
And make some coffee, hold me up
Try to talk me out of giving up I'll come back to you
It'll be brand new
But I promise
We're just friends
