

She's Been Drinking

Will Varley

she's been drinking
bottles to herself
and i've been
worrying her

now that she is
dressed in black with
sleeves that come down
past her wrists and

well she's not the girl that i knew when we left school
she's not the girl on photographs on my wall

she's been taking
all she can be
ever since she
dropped out of uni

well she thinks that she never makes a sound
but we all see her footsteps on the ground

she's been lying
to herself and
i've been trying
to get help but

she keeps rolling
round in circles
taking bites from
poisoned apples

i always think of her in june
making faces in my room

she's been drinking
bottles to herself
and i've been
worrying her

now that she is

dressed in black with
sleeves that come down
past her wrists and
