

Fade

Steele

I know you fled
You got afraid and ran away
But didn't I do
All that I could to make you stay Flawless in fact
The way that I act around you
So don't come and say
I didn't go out my way to please you Tell me would you explain
Did I deserve the pain
I swear we could've done something better just You and I together
Tell me what did you gain
From going back to the same
Shitty life that you used to have before me And now you want in
Back in my life are you sick
Where have you been if I was a guy
I would've told you to suck my Cause I'm not like one
Of all of the dumb flings
And I'm not afraid
For our love to fade
I'm just asking Tell me would you explain
Did I deserve the pain
I swear we could've done something better just you and I together
Tell me what did you gain
From going back to the same
Shitty life that you used to have before me
